To Whom it May Concern:

Municipal Leasing Consultants would like the opportunity to be listed as a financing participant on your web site. Toward this end, please consider this our letter of financial participation.

Municipal Leasing Consultants offers its customers unique opportunities in the tax-exempt municipal financing market. We can provide them with competitive, flexible, and convenient financing terms always tailored to their specific budgetary needs.

Lease purchase financing is a cost effective alternative versus bonding for the capital equipment necessary to provide quality public services. Any equipment essential to our customers can be financed including "green" technology, energy projects, emergency vehicles, highway equipment, modular buildings, telecommunication and technology equipment . . . just to name a few! In addition to providing them with unprecedented personal customer service, we can also provide them with a list of qualified vendors, and attorneys should they require them.

We are extremely proud of our track record. Over the past twenty years we have successfully negotiated and funded in excess of \$1 billion in municipal leases throughout the United States. In addition, we have completed over \$400 million in energy conservation projects with school districts and municipalities.

All of us here at Municipal Leasing Consultants look forward to working with your association members in the very near future.

Sincerely,

Reneé M. Piché
President
